PsychArchives Cooperation Partners

COSMO

COVID-19 Snapshot Monitoring

COSMO Project

COSMO (COVID-19 Snapshot Monitoring) is a joint project of the [University of Erfurt](#), the [Robert Koch Institute](#), the [Federal Centre for Health Education](#), the [Leibniz Institute for Psychology \(ZPID\)](#), the [Science Media Center](#), the [Bernhard Nocht Institute for Tropical Medicine](#), and the [Yale Institute for Global Health](#). In addition to funding from these research partners, COSMO is financially supported by the [Klaus Tschira Foundation](#). Initiated during the current outbreak of the coronavirus, the goal of the COSMO project is to monitor public perceptions of risk, protective and preparedness behaviours, public trust as well as knowledge and misinformation to enable government spokespeople, the media, and health organizations to implement adequate responses.

PsychArchives stores the WHO standard protocol as well as preregistrations of national COSMO studies. Preprints by COSMO Germany are continuously made available, and the research data of each COSMO Germany study wave can be requested via data request form. Find [content belonging to the COSMO project](#) in PsychArchives.

hogrefe

Hogrefe Publishing

Hogrefe Publishing is Europe's leading publisher in psychology, psychotherapy and psychiatry. Established over 70 years ago, Hogrefe is a family-owned company, which has grown across Europe in the past 17 years. In addition to 2,500 available books in eleven languages, 1,600 eBooks and 41 journals, their program includes 1,600 psychological tests in 20 languages, which are used, for example, in clinical diagnostics, education and human resources.

In September 2018, the German Psychological Society (DGPs), the Hogrefe Publishing Group and the Leibniz Institute for Psychology (ZPID) entered a partnership to foster research transparency, reproducibility, and replicability in Psychology, encompassing a comprehensive and interrelated set of open science offerings. [Read the full announcement](#)

[of the partnership here](#). Within the frame of the cooperation, PsychArchives has become the preferred repository for Hogrefe journals. Find [Hogrefe content](#) in PsychArchives.

Being closer means to be more advanced – facing a fair future for the gifted children

Highly gifted children and young people are the subject of our foundation. Our mission is to shape the German educational system into one that supports the gifted. Being an expert of the needs of the gifted and potentially high-performing child, the Karg Foundation is seeking better ways for the promotion of highly gifted children; professionally and in partnership with others. In doing so it follows a motto: an educational system that meets the needs of the highly gifted and enables them to develop their personality on the basis of their particular strengths.

We are specialized in guiding our educational system in Germany into a better future – above and beyond our own programs and projects. The [Executive Board](#) and [Board of Trustees](#) transform the various activities of the foundation together with an engaged team. The Karg Foundation was founded in 1989 by the department store entrepreneur Hans-Georg Karg and his wife Adelheid Karg. Today it is the largest acting foundation in supporting gifted children in Germany. Its total assets amount to around 125 million euros (in 2017).

PsychArchives stores a range of secondary publications by the Karg Foundation; new issues are added continuously. Find [Karg Foundation content](#) in PsychArchives.

Active since 1993, Psychosozial-Verlag is a German publisher of books and journals from the disciplines of psychology and the social sciences, with a focus on the fields of psychoanalysis, psychotherapy, psychosomatics, family therapy and the connection between psychological and social issues. Contrary to the prevailing trend towards a narrowing of the subject-specific perspective, Psychosozial-Verlag aims to revive the dialogue between the psychological and the sociological sciences and as well as the dialogue between the various helping professions.

In the frame of an ongoing cooperation with PsychArchives, Psychosozial-Verlag provides Open Access to a variety of books via the repository, and has made an extensive set of

journal volumes available in Open Access in the form of secondary publications. PsychArchives features over 700 articles from the “Journal für Psychologie”, “Psychotherapie-Wissenschaft” and “à jour! Psychotherapie Berufsentwicklung”. New volumes are added on a regular basis. Find [Psychosozial-Verlag content](#) in PsychArchives.
